

Vallis' Guinness World Records 2 – KS1

Mr Tickle has the longest arms and Mr Tall has the longest legs. Create a new 'record breaking' Mr Man or Little Miss. He/she may have the biggest feet, the sharpest teeth or the longest beard. Can you write a new book about the adventures of your new character? Make sure you illustrate it too!

Our Next Theme

We love seeing what you have all been up to at home whether it's from the grid or your own activities. We would like you to give us some ideas for our next whole school theme and the sorts of activities you might like included.

Write your whole name. How many words can you make using those letters? What is the longest word you can make?

Find the longest word in your reading book? What is the longest word you can spell without peeping?

'BEST BIRTHDAY BASH'

While we haven't been at school lots of you have had birthdays or have them coming up soon. This week Ms Rainford, Mrs Molloy and Mrs McPherson celebrate their birthdays so we would like you to have the best birthday party ever at your house!

You will need to write invitations to everyone in your house, plan what games or activities you are going to do (make sure you write the instructions of how to play them), design and bake the most amazing birthday cake, design and print wrapping paper for presents and pass the parcel, decide what food you are going to have and work out how much you need to make for everyone, design a banner, make things for the party bags for all your guests..... There's always so much to plan! We look forward to seeing all the photographs of you having a great time! Could it be the biggest birthday ever!!

What is the longest/smallest object in your house? Use hands, feet or a tape measure.

Make up your own Olympics! Challenge your family at home or friends on facetime to a sack race, garden sprint, welly throwing or skipping. You might even make an obstacle course and see who can complete it in the fastest time. Who are the Vallis Record Breakers?

Find out who has been a record breaker in the past-First man on the moon, first person in space, first person to discover America. What other exciting records can you find out about? Fastest car? oldest person? largest bird? Make a poster or a PowerPoint about all the interesting facts you find out.

Find the smallest box in your house. Try and fit as many objects as you can inside it? Estimate (good guess) how many objects you think there are before you count them. Were you close?
